

External-gear-pumps with mounting bracket series D

Construction

Self-priming external gear pumps are designed for industrial applications. Positive displacement pumps with a wide range of capacities. Suction- and pressure-connections Whitworth pipe threads - opposite 180° (Series D5xx also available with SAE-flange).

Applications

Industrial applications, for example:
Lubrication systems, coolant feed in machine tools, heat transfer, test bench and many more.

Example of liquids suitable for transport

Pure, non-explosive liquids, not corrosive against pump materials, without any solids. The liquids to deliver, must have lubricating characteristics.
Oil, mineral oil, synthetic oil, adhesives, sealants, polymers, diesel, paints, inks and many more

Operating conditions

Liquid temperature: -10°C up to +60°C (NBR)
-40°C up to +250°C on request
Ambient temperature: -20°C up to +40°C
Operating pressure max. 100 bar
others on request

Drives

For example: hydraulic motor, electric motor
drives without axial / radial forces on the drive shaft

Materials

components	standard	on request
casing & cover	cast iron - EN-GJL-250 - (GG25)	ductile cast iron(GGG40)
shaft	steel	
gears	Steel, hardened and grinded	
bearing bushes	composite bearings	
shaft seal	sealing ring NBR	FPM, PTFE, GLRD, packing gland
mounting bracket	Aluminium
